

ECLECTIC EXPERIENCE AT MATH-E-MAGICIAN, 2017

“Mathematics is the knowledge with which God has written the universe”- Galileo.

The school has always displayed tremendous affinity to identify, encourage, promote and nurture the talent of students and also to reduce the fear of mathematics in them. Students got a wonderful opportunity through participation in the Math-e-Magician competition 2017-18. Around 800 students from 20 C.B.S.E. schools of the NCR participated in the event. An Olympiad, covering different mathematical concepts was organised for different age groups.

The highlight of the competition was the 'Rhythm-o-meter' where in an interdisciplinary approach was adopted. Participants presented their songs based on the theme 'Mathematics'. The enthralling renditions evoked great appeal amongst the audience as they swayed to the rhythmic beats. The event culminated with the result declaration.

Ansh Jain of Class VIII-B secured the third position in the category M.C.I.
